[Hem. Ind. 67(4) (2013) 593–599, doi: 10.2298/HEMIND120815100P]

This article has been retracted at the request of authors.

The retraction has been made because the authors admitted that they have done dual submission of the text and drawings from article named “Environmental Cd and Zn Concentrations in Liver and Kidney of European Hare from Different Serbian Regions: Age and Tissue Differences” published in Bull. Environ. Contam. Toxicol. **90** (2013):203–207, DOI 10.1007/s00128-012-0901-7.

One of the conditions of submission of a paper for publication are that authors confirm that their work is entirely originally written, someone else’s data and/or text are appropriately cited or quoted and permission has been obtained for use of copyrighted material from other sources. Therefore, the retracted article represents a serious improper usage of the scientific publishing system.

Apologies are offered to readers of the journal Hem. Ind. since this abuse was not detected during the submission, *i.e.*, peer review process.
